Introduction

Advantech Intelligent Gateway is an IIoT gateway solution which does data aggregation and preprocessing at the gateway layer which reduces unnecessary data relays to the cloud, thereby lowering overall solution cost. Using WISE-PaaS/EdgeLink protocols, you can acquire the raw data from various sensors and devices. Through the bundled iFactory/Data Gateway data acquisition software you can configure and preprocess data and create a simple visual dashboard at the gateway layer. We also provide a total solution that allows you to upload preprocessed data through iFactory/Data Gateway to our cloud solution through MQTT service.
